

1 Please Tell me About Your self

I'm Muhamad Saikat from Khulna, Bangladesh, study in BM. I'm passionate about web development and proud to be a junior react developer. I'm enthusiastic about staying updated with the latest industry trends. My dedication to learning drive me to explore new technologies and improve my coding skills continually. I'm excited about the opportunities to further develop my expertise and make meaningful contribution to the field of web development.

2 Tell us something about your strength.

I have a lot of patience, also ability to work on time. Very focused on work Very interested in learning new technologies .

3 Tell us something about your weakness

I am overthink ,I have lot of problems in learning a new technology by myself in the begging ,but I keep trying.

4 Tell us something about your best project

My best project is Building Management (mern stack). There is three role admin , member , user. By default any one will be user. User can request for rent only one apartment. After for rent request admin can manage those rent request . If admin accept the rent request then user will be member can he will get access member dashboard. And admin reject rent request then he will be still user. After be a member he can payment for this rented apartment. Also can his all payment history. Admin can also manage member . If admin remove a member then that member role will be again user, can not access to member dashboard.

5 What is your vision in this web development field that you want to achieve in next 4-5 years?

Inshallah if I live in the future, I want to see my self as Full Stack developer. Want problem solving skill. And want to be a master data structure and algorithms.
