

1 . My core values and beliefs.

As a junior React developer, fundamental values include a commitment to create user-friendly experiences , continuous learning to stay updated with React and web development , collaboration with teams, attention to detail in both design and code , and a problem-solving mindset .

My beliefs as a junior React developer can serve as guiding principle that shape my approach to work and my professional identity . If I have continuous improvement , power of collaboration , problem solving mindset , improve my communication skill when I will be a good developer at the end of the day.

2 . what is my goals and aspirations.

As a front end developer my goal is to work on the front end for the next two to three years. And by gaining skill in front end , focus on back end development and become a full stack developer at the end of the day.

3. How does personal branding differ from self-promotion, and why is this distinction important?

Personal branding is about creating a comprehensive, authentic identity that goes beyond skills, emphasizing long-term strategies and diverse content. Self-promotion, however, is more immediate, focusing on specific achievements for short-term goals. The distinction is crucial, as personal branding builds relationships and long-term success, while self-promotion may risk appearing opportunistic or transactional. React.js developers benefit from blending technical skills with a well-rounded professional identity.

4 What are the first steps i will take to build your personal brand?

Self-Reflection: Identify strengths, values, and passions in React.

Define Your Niche: Specialize in a specific React area.

Online Presence: Create a professional LinkedIn profile.

Develop a portfolio website.

GitHub Contributions: Contribute to open-source projects. Maintain a clean GitHub profile.

Networking: Connect with React professionals on LinkedIn and Twitter.

5. What am I most proud of?

I am very proud of myself as a developer. This is because development is a very popular and in-demand job. And it is very creative work. This job requires me to learn new things and adapt myself to the technology with the times, so I feel proud as a developer.
